Skills

C# & .NET

Java

Python

Web Dev (HTML/CSS/JS)

SQL & Databases

Linux & CLI

OOP & DSA

Profile

Software Engineering undergraduate (2028) with a strong foundation in desktop application development using C# (.NET Framework), Java, and Python. Passionate about Object-Oriented Programming (OOP), Data Structures, and Algorithm Analysis. Experienced in building intuitive user interfaces with Windows Forms and Java Swing. Eager to contribute to professional software teams, leverage analytical skills for complex problem solving, and continuously adopt modern development practices.

Projects

Restaurant POS System

2026

Python & Django Desktop Application

- Developed a native desktop POS application featuring a modern dark-themed register UI and real-time kitchen displays.
- Built a robust Django REST Framework backend coupled with PostgreSQL database for inventory and order management.
- Integrated interactive sales analytics dashboards using Chart.js and automated transaction-ready printable receipts.

HR Management System

2025

C# .NET Desktop Application

- Developed a desktop application using C# and .NET to streamline HR processes.
- Implemented a job ranking algorithm to filter and sort candidates based on weighted criteria (Experience, Skills).
- Designed candidate data management, automated scoring, and reporting interfaces.

Restaurant Management System

2024

Java Swing Application

- Built a comprehensive management solution for restaurants using Java Swing.
- Key modules included table reservation, order processing, inventory tracking, and billing.
- Utilized OOP principles to ensure code modularity and maintainability.

AlgoPuzzleBoard

2024

Educational Visualization Tool

- Interactive platform visualizing complex algorithms like N-Queens and Knight's Tour.

- Implemented dynamic UI updates using C# to demonstrate backtracking strategies step-by-step.

Education

Bachelor of Software Engineering

SEPT 2024 - PRESENT

Bahria University, Karachi

Focus Coursework: OOP, Data Structures, Algorithms, Calculus, Linear Algebra.

Intermediate (Pre-Engineering)

COMPLETED 2024

Karachi Public School

Certifications

- **Certified Software Engineering Student** - Bahria University
- Participant in internal coding hackathons and logic building competitions.
